Urine tests for blood in which the hemoglobin acts as a peroxidase to oxidize indicators such as gualac, benzidine or orthotoluidine may give a false positive in the presence of traces of such inorganic materials as copper, bromides, or iodides. Iodides are the most frequent cause of error in such tests. These tests should not be used for patients who have been on any type of iodine (Biological Sciences--Pathology, TT, v. 10, no. 12)
